They say nothing
mixes well with scotch.
Except our metals.

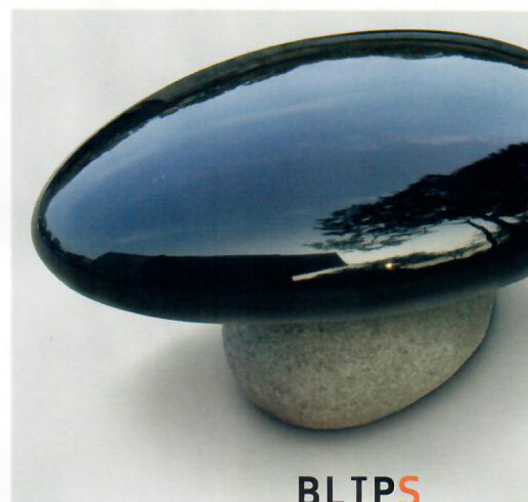

Classic metals from Chemetal.
Popular HPL and solid metal designs.

Classic Metals are Chemetal's HPL and solid metal designs in the 700 / 800 / 900 Series. They bring the luxury and energy of metal to design spaces of any size. Here: #906 Brushed Copper Aluminum in Johnny Walker House. Call or visit to see them all.

CHEMETAL

**First came carbon fiber, then
basalt...**

Now it's lacquer, inspired by his South Korean heritage. Byung Hoon Choi introduces lacquered red-oak seating and table forms in "**Water Meditation**," at New York's Friedman Benda gallery through December 17. He mixes pigment into the lacquer for an exceptionally reflective, practically liquid effect.

Actual liquid runs through his fountain in basalt and granite.
