Case Studied

Two years ago, **Joris Laarman** scored a place in MoMA's permanent collection for his Bone Chair, which mimics the efficiency of human bones. His mission, using life-science lessons to make functional art, is further realized at the Friedman Benda gallery beginning March 4. Utilizing technology hasn't kept Laarman from challenging it: his Stair bookcase was devised to rival an e-reader—at 18 feet tall, it holds just as many books (around 1,000), and its owner will never have to upgrade. *March 4–April 10 at Friedman Benda, 515 W. 26th St., 212.239.8700, friedmanbenda.com*

IT ROCKS! Joris Laarman's Bone Chair.
